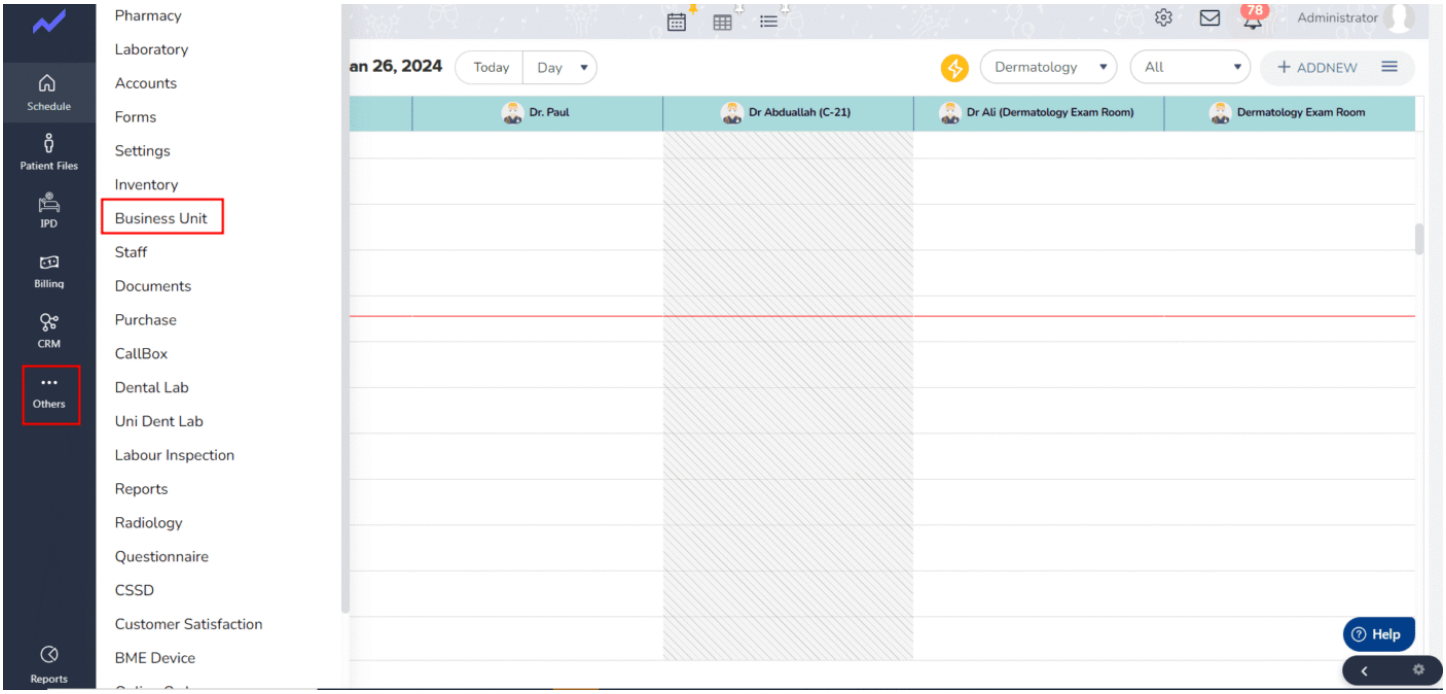
How to Setup Summary Voucher in Cloudpital?

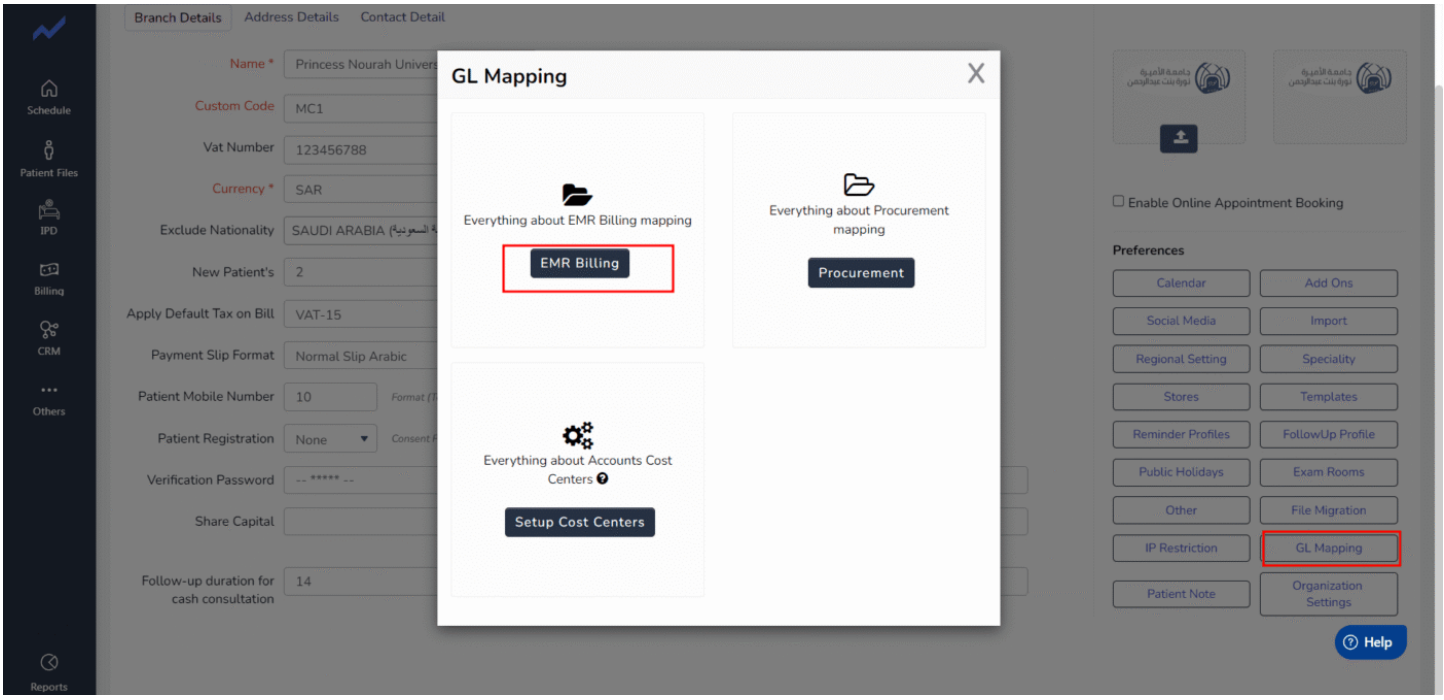
ERP JV integration posting · https://www.cloudpital.com/docs/how-to-setup-summary-voucher-in-cloudpital/

Summary Vouchers are an essential part of accounting, and Cloudpital makes it easy to set them up. Here's how to do it:

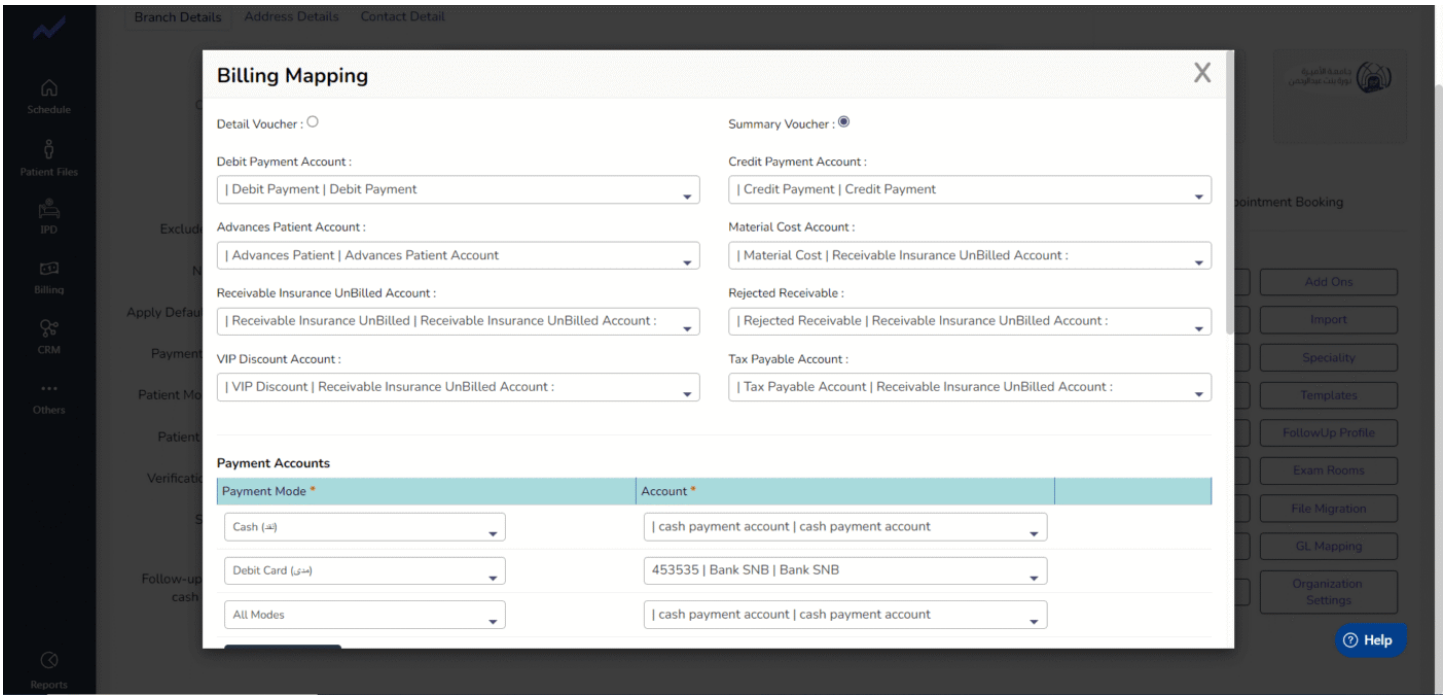
- First click on **Others** => **Business unit** => **Edit business unit** => **GL Mapping**



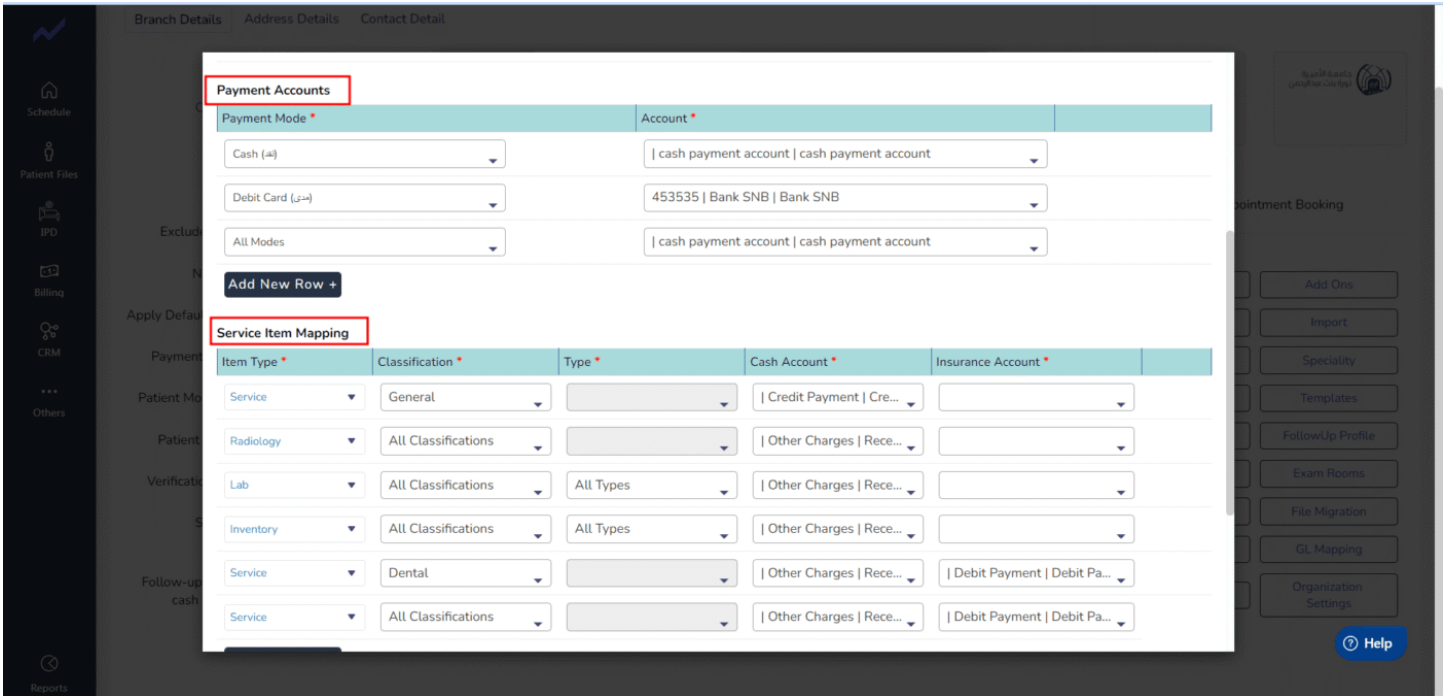
- Click on the **EMR Billing** to map the Summary Voucher.



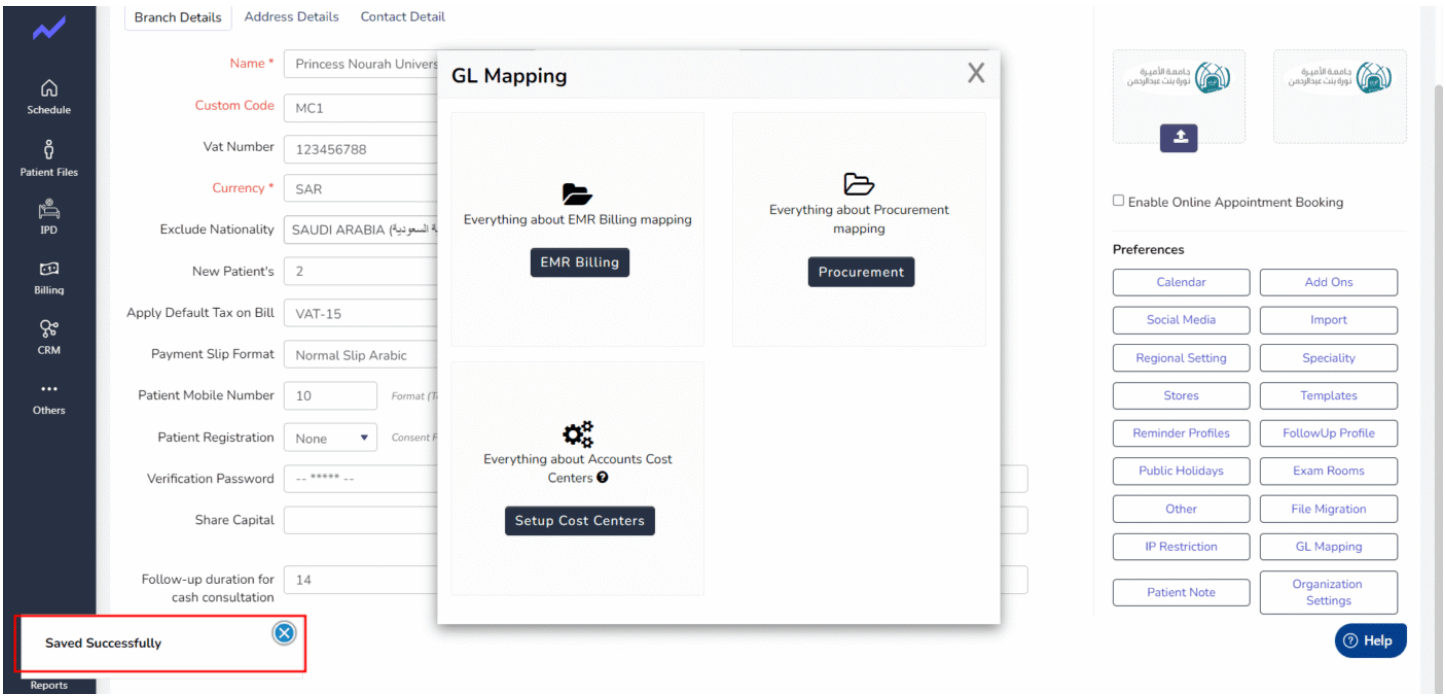
- In this screen **Map the fields**



- Also Map the **Payment Accounts** and **Service Item Mapping**



- When we click on save system generates a message **"Saved Successfully"** .



It's important to note that summary vouchers are used to summarize multiple ledger accounts into a single voucher. This can be useful when you have a large number of transactions to record and want to simplify the process.
