How to Add Precautions for Admitted Patients in the IPD Module in CloudPital

IPD (Inpatient Department) · https://www.cloudpital.com/docs/how-to-add-precautions-for-admitted-patients-in-the-ipd-module-in-cloudpital/

Precautions:

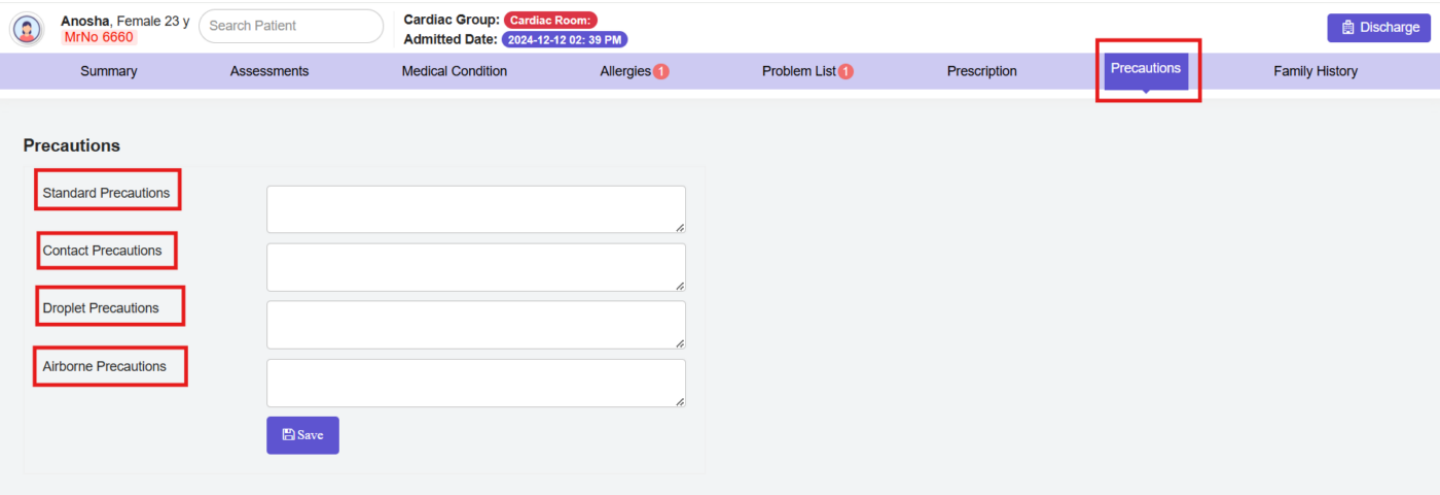

Click on the **Precautions Tab**, where you can add any specific instructions or warnings related to the patient's care or treatment.

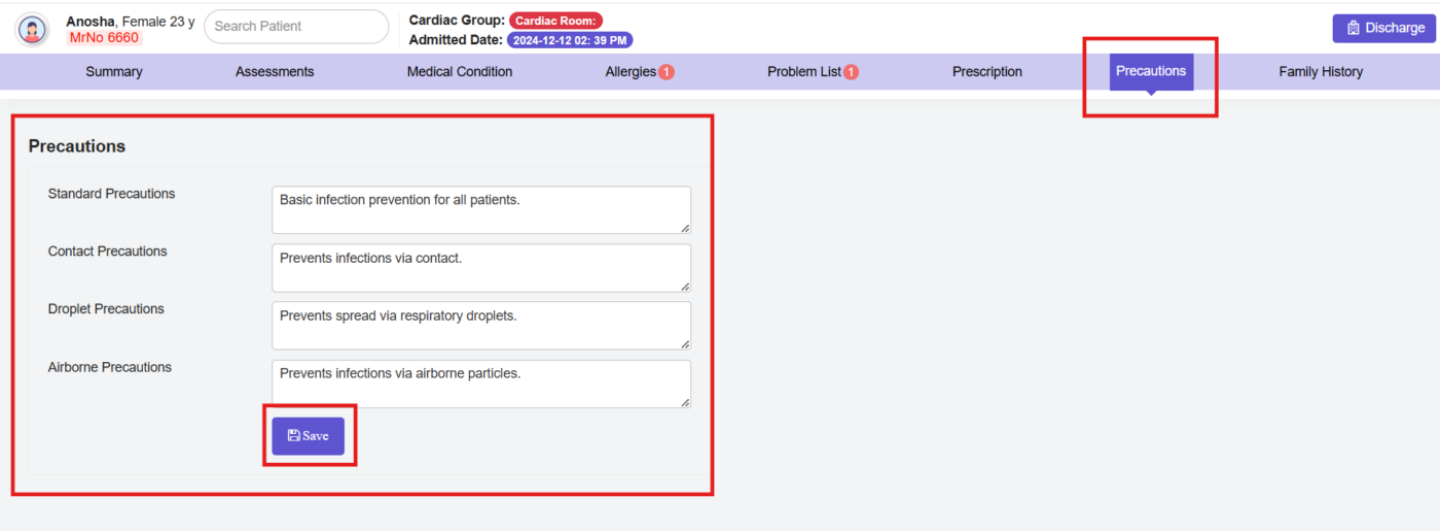

On the **Precautions** screen, you will find four fields:

1. **Standard Precautions**
2. **Contact Precautions**
3. **Droplet Precautions**
4. **Airborne Precautions**

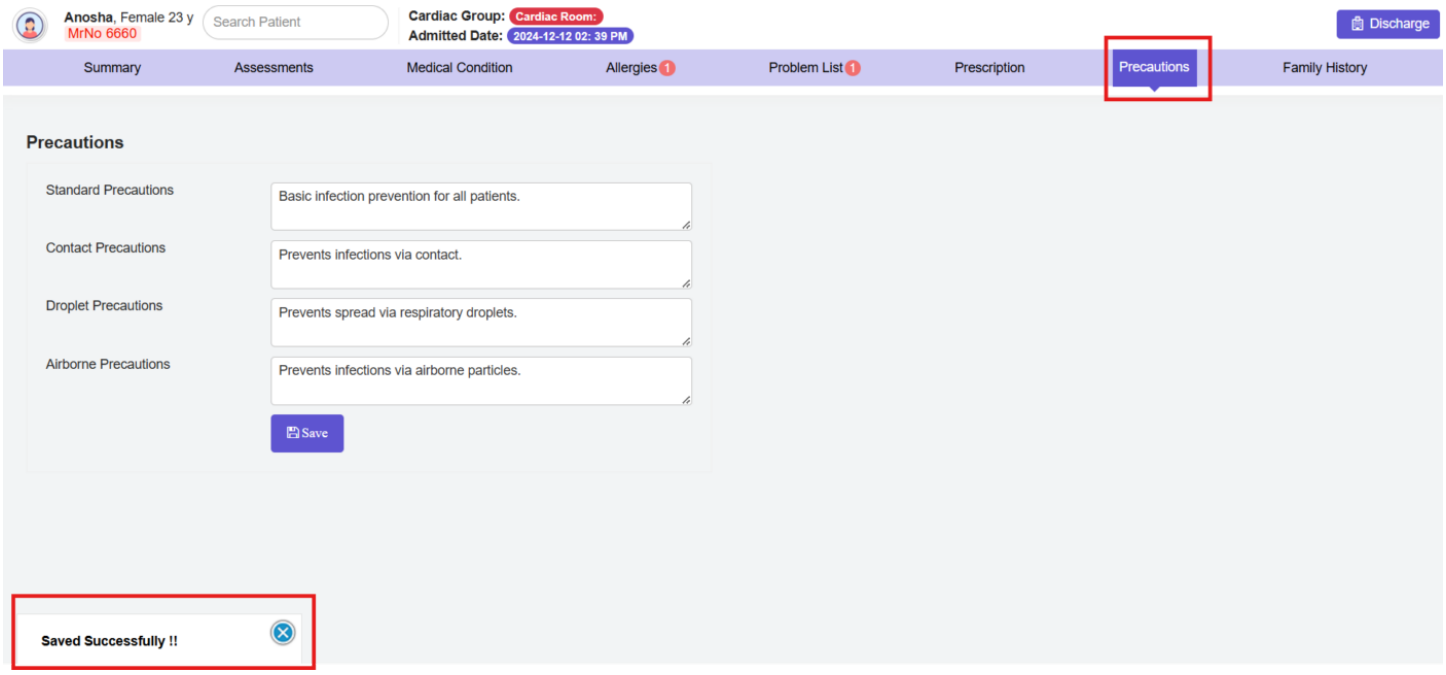

Fill in these fields based on the patient's condition and specific requirements. This ensures proper handling and care during the patient's stay.

After entering the necessary details, click on **Save** to record the precautions.

When you click on the save button (Saved Successfully) message will appear and the record of Precautions will be saved in the list.
